

Assignment Name: Console Challenge

1. JavaScript Code

```
let num1 = Number(prompt("Enter first number:"));
let num2 = Number(prompt("Enter second number:"));

console.log("Addition:", num1 + num2);
console.log("Subtraction:", num1 - num2);
console.log("Multiplication:", num1 * num2);
console.log("Division:", num1 / num2);
console.log("Modulus:", num1 % num2);
```

2. How to Run the Code

Method: Using Browser Console

1. Open **Google Chrome**
2. Right-click anywhere on the page
3. Click **Inspect**
4. Go to **Console tab**
5. Type:

allow pasting

6. Press **Enter**
7. Paste the JavaScript code
8. Press **Enter**

3. What Happens When You Run It

- A popup will appear asking for the **first number**
- Then another popup for the **second number**
- After entering values, results will be shown in the console

Example output:

```
Addition: 15
Subtraction: 5
Multiplication: 50
Division: 2
Modulus: 0
```

4. Explanation of Code

`prompt()`

- Takes input from the user
- Always returns a string

`Number()`

- Converts input into a number
- Required for calculations

`console.log()`

- Displays output in the browser console

5. Operations Performed

- Addition (+)
- Subtraction (-)
- Multiplication (*)
- Division (/)
- Modulus (%)

6. Conclusion

This program performs basic calculator operations using JavaScript inside the browser console. It demonstrates user input handling and arithmetic operations.
